

## LED POSEUR TABLE USER GUIDE

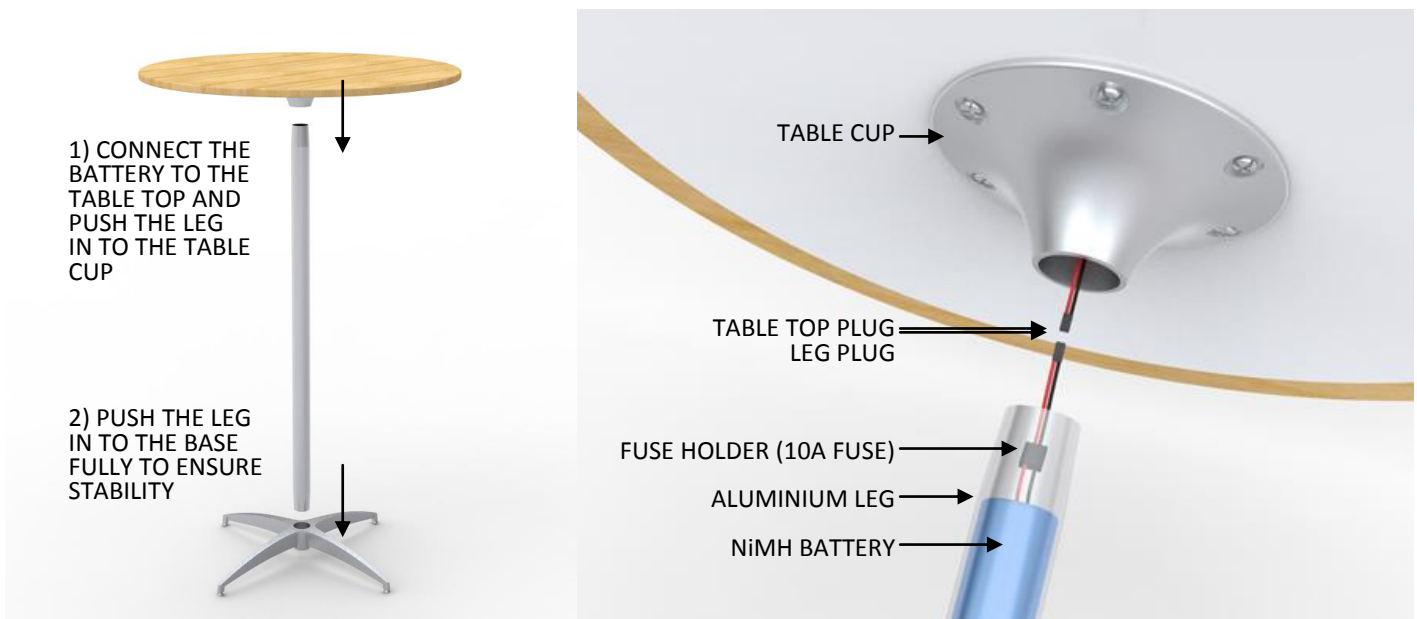

*Thank you for purchasing the Grumpy Joes LED Poseur Table.*

Please read the following guide carefully to ensure correct assembly, operation and maintenance of the product.

The Poseur Table features an aluminium base, leg and table cup and 18mm thick Birch ply, 760mm diameter lacquered top. The table is both lightweight and sturdy and requires no tools for assembly. Within the table top there are 6 super-bright, RGB-LED modules which are controlled from the IR remote and powered by the NiMH battery built in to the leg. Stretchy covers are available in white or black which gently diffuse the illumination.

Follow these steps for correct assemble and operation:

The IR remote allows the user to set the colour or choose fade/flash patterns. The battery can last up to 36h hours on a single charge and will not deteriorate if left depleted. To re-charge, use the supplied unit only connecting it to the plug found in the leg. If the table does not work check the fuse and replace if necessary.

We recommend cleaning with non-abrasive solutions and soft cloths / pads. Care should be taken when storing / transporting to minimise the risk of damage. We sell a purpose-made trolley which holds up to 10 complete tables.
